Steel

Aluminium

Solar power systems

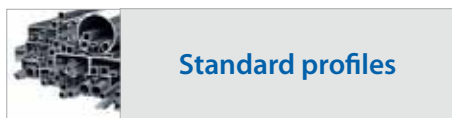

We offer a wide variety of metallurgical – steel – products, both standard and custom-made to the client’s specifications. Our credo is individual approach, perfect services and supplying of materials tailored to the customer’s needs in the environment of the ever growing demands and of the ever more complex processes. Our main suppliers include European and international manufacturers. In the field of metallurgical products, our company demonstrates flexibility and dynamic growth, and currently manages a wide client portfolio all over the world. In the market, we occupy the niche of suppliers of metallurgical materials of all types, including:

In 2011 we have included purchasing and supplying of aluminium in our services. Our main suppliers are European manufacturers, but we also have manufacturers in Turkey, China etc. Currently we represent four foreign foundries. Aluminium is mainly used where materials need to be easily welded and supplied with finishes, be corrosion resistant and light. The products we offer are manufactured using the most modern production lines. For example, aluminium profiles are manufactured using stencil-pressing. Our general offer includes:

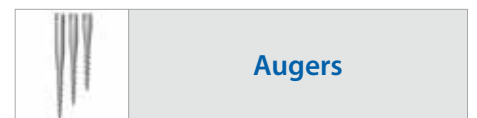

We are an important partner of the largest investors and manufacturers of solar power systems. We take part in realization, supply, construction and installation of solar power plants on a turnkey basis all over the world. We offer comprehensive consultations in the field of photovoltaic power plants and provide the necessary investments. We also offer all the necessary construction products. Everything for the most demanding client, for expedient and economically efficient solutions:

Steel pipes

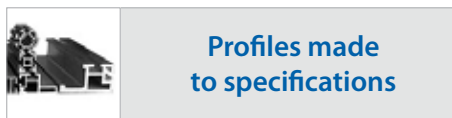

Standard profiles

Augers

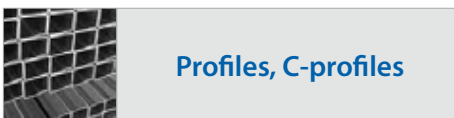

Sheet metal and sheet steel

Profiles made to specifications

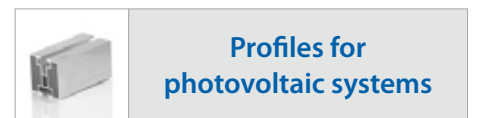

Aluminium and steel constructions

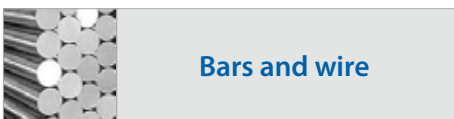

Profiles, C-profiles

Sheet metal

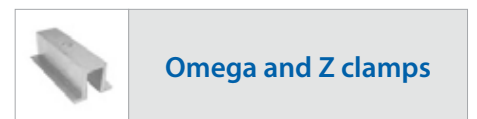

Profiles for photovoltaic systems

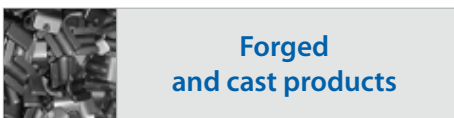

Bars and wire

Aluminium cut-offs

Omega and Z clamps

Forged and cast products

Aluminium products

Services

Due to the wide variety of the services we provide – from purchase of metallurgical and aluminum products to distribution, storage and just-in-time delivery – our company has concluded frame agreements with every representative of this trade chain. Because of the ever-growing demands to the quality of supplies, the company has established a focused cooperation with partners in the industries of:

Metal manufacture

Transportation

Realization of solutions on a turnkey basis

Storage

We offer the services of a recently renovated, heat insulated and climate-controlled warehouse. Currently we have available 1000 m² of storage space with an expansion option (by extension of the building). The warehouse is provided with three motorized cranes with the lifting capacity of 8000 kg each, as well as with a modern shelf system. The warehouse is directly accessible not only from the highway, but also from the railroad – unloading and re-loading of railway freight cars is possible.
